The map looks very good. Thank you for creating it!

Linda: here's a map with nitrate results based on field Hach test strips. **Ex. 5 Deliberative Process (DP)**

**Ex. 5 Deliberative Process (DP)**

**Ex. 5 Deliberative Process (DP)** I'll let Cheryl answer your question regarding timing of lab results.

We took shallow and deep samples at each location (generally 45-49' and 30-34' below surface). So some of the points have two circles indicating different N concentrations and the two depths. If only one concentration circle is present at a sample location it means both shallow and deep samples had the same result.

Thanks,  
Dean
